GETTING THE OAE READY FOR GLOBAL COLLABORATION

WILLIAM CULLERNE BOWN EXECUTIVE CHAIRMAN, *RESEARCH PARIS, 31 JANUARY 2017

***UNITY**

Global hosting partner to the OAE Project

20,000 tenancies worldwide

About half with Single Sign On

100s of thousands of users

Run by *Research, based in London

Major contributor to the OAE code

OAE - ENGINEERED FOR SCALE

Thousands of institutions

Millions of users

Collaborating in real time

Uniquely capable

Makes it possible to develop an open source ecosystem supporting everyone in academia

REALISING THE POTENTIAL

Engineering a foundation

But many "soft" barriers to adoption by both:

- Users
- Institutions

USER BARRIERS

Awareness

Feature set

Ease of collaboration

- in my institution
- in other institutions

Inertia

INSTITUTIONAL BARRIERS

The focus of work in 2016

Non-functional concerns:

- Sovereignty
- Security
- Privacy
- Service
- Legal status

INSTITUTIONAL SOLUTIONS

Lightweight

- Access management federations
- Free

Heavyweight

- Service Level Agreement
- €880 a year

LIGHTWEIGHT - FEDERATIONS

Non-functional guarantees

Leverage of mass withdrawal

Not supported by Silicon Valley

WORK WITH THE FEDERATIONS

Expanded membership: now 10 + Edugain

Expanded range of tenancies connected via federation membership

Research & Scholarship tag done

CoCo tag on the way

HEAVYWEIGHT - SLA

Service Level Agreement is a contract
Requires wide range of corporate policies and procedures
eg EU personal data compliance

 eg"Model Clause" subcontracts with suppliers outside the EU

Now being used by paying customers

CONCLUSION

OAE now ready for institutional adoption worldwide via *Unity

Agenda for 2017:

- Continued expansion of federation support
- Raising awareness among CTOs and IT Services
- Focus on barriers to user adoption.
