## Installation

- Download last version of portlet war from [esup maven repository](#)
- From uPortal launch **ant portlet.deploy -DportletApp=/path/to/war/portlet.war**
- As uPortal administrator register this new portlet
  - Don't forget editing preferences (see below)

## Configuration

### Preferences

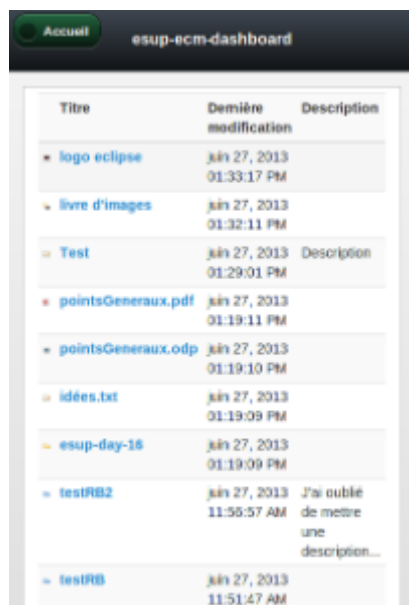

Name	Definition	Editable	Example
nuxeoHost	Nuxeo URL	YES	http://localhost:8080/nuxeo
nuxeoPortalAuthSecret	Secret used by Nuxeo <a href="#">portal-ssso</a> authentication layer	NON	ITJDrlUWLGZ1fNSil795
NXQL	NXQL to used by this portlet instance	YES	SELECT * FROM Document WHERE ecm:path STARTSWITH '/default-domain /workspaces/' ORDER BY dc:modified DESC
maxPageSize	Number of entries by page	YES	10
columns	JSON describing columns to be displayed (list of Nuxeo document attributes)	YES	["dc:title", "dc:modified", "dc:creator", "dc:description"]

"Editable" is useful uniquely if uPortal administrator add edit capability to the portlet.

In this case, if uPortal administrator configure a preference as read-only=false, this preference will be editable with the portlet edit view.
