

# Configuring exception handling

- [The log level for the exceptions](#)
- [Recipient of the exception reports](#)
- [Sending the exceptions to the developers](#)

Exception handling is configured in **/properties/config.properties**.

## The log level for the exceptions

Can be set to any value usually accepted by log4j:

```
#exceptionHandling.logLevel=INFO
```

## Recipient of the exception reports

Exception reports are sent by email to the address set by this property:

```
#exceptionHandling.email=bugs@domain.edu
```

## Sending the exceptions to the developers

Exception reports are sent automatically to the esup-helpdesk developers (**helpdesk-bugs@esup-portail.org**). To invalidate this feature, set the following property:

```
exceptionHandling.doNotSendExceptionReportsToDevelopers=true
```
